

Roaring Into Zoos

You might call it an *animal attraction* but it certainly is a *natural fit* that Houston-based **American Pole and Timber** has become a regular supplier of zoo projects nationwide and even in Mexico.

“Zoo exhibits are perfect matches for American Pole and Timber. They allow us to showcase our unique structural wood products and custom production capabilities and the zoos always get impressive-looking exhibits that will last virtually forever.”

- Eric Lincoln, American Pole and Timber Senior Project Consultant

Zoo projects supplied by American Pole and Timber include:

- Erie, PA Zoo - Tiger Exhibit
- Houston, TX Zoo – Mammalian and Wild Dog Exhibits, Entrance to Africa Exhibit
- Waco, TX Zoo – Walking Paths

Tiger Exhibit Now Open

Erie, PA Zoo - The poles and timbers for the new tiger exhibit were supplied by American Pole and Timber

Other zoos they have supplied include Longview Zoo, Dallas Zoo, Mexico City Zoo, Gladys Porter Zoo, Miami Zoo, Peoria Zoo, and Columbus Zoo.

The company **began in 1993 as a supplier of treated wood products for marine and shoreline construction** projects (seawalls, bulkheads, beach homes, bridges, etc.). While still true to their roots, they have become experts in other niches in which their treated poles and timbers, polymer wood coatings, and custom manufactured products are commonly used.

In addition to zoos, American Pole and Timber supplies numerous projects for other recreational establishments including water parks, arboretums, and theme parks.

The company **sees zoos as offering opportunities for all types of contractors** from plumbers to electricians to carpenters. Zoo projects are always unique and a little challenging so everyone involved really gets to show what they can do.

American Pole and Timber, the national division of Texas-based Building Products Plus, LLP, is a **member of the National Home Builders' Association (NHBA), the Wood Truss Components Association (WTCA), and the Greater Houston Builders' Association (GHBA).**
