### GeoDeck Composite Decking

Building Products Plus is the Texas Distributor of GeoDeck composite decking.

*Awarded "BEST BUY" rating in Consumer Reports*

GeoDeck's family of composite decking products looks as good as natural wood while offering the added benefits of being fade resistant and maintenance free. Available in Traditional, Tongue & Groove, and Heavy-Duty Commercial profiles, GeoDeck is designed for quick installation.

GeoDeck composite decking products are backed by a 20-year limited warranty against warping, cracking and insect damage.

### COLORS

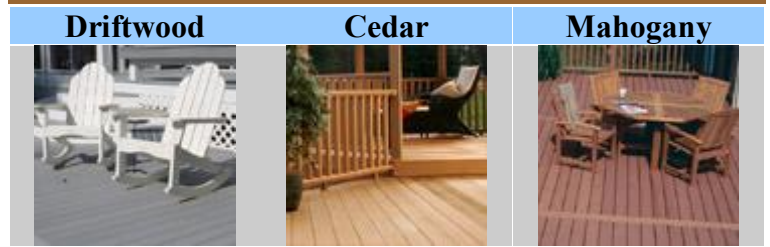

**When you choose a color from GeoDeck, you'll know that rich color is going to last.**

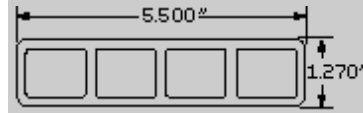

GeoDeck is the only brand on the market that contains Biodac®, an exclusive product made from purified cellulose fibers and other minerals. Unlike wood flour or wood chips used in other composite products, Biodac does not contain high amounts of Lignins—a major contributor to fading of composite material. The result is a superior deck that looks great year after year.
