

Limitless production capabilities for custom wood components

# We're like a machine shop for timber products. Tell us what you need -- we can make it.

## Commercial, Industrial, & Residential

After more than 20 years in business, we've made just about everything out of wood.

From matching the look and finish of existing timber trusses inside fire-damaged historical buildings to building crates for shipping of 2,000 ton equipment overseas -- we've done it all. Of course, we regularly supply custom materials and components for zoos, churches, sports & recreation centers, resorts, office buildings, retail, and amazing custom homes.

## Tell Us What You Need & We'll Make It

Our capabilities are *your* capabilities! Whether you have a drawing on a napkin or complete, engineered designs we can turn your ideas into delivered wood products built to your specifications.

No matter where you are in the world or what you need built, take advantage of our experience, flexible production capabilities, and detail-oriented systems. Call 866-397-3038 or visit [PoleAndTimber.com](http://PoleAndTimber.com) for information and quotes on your projects.

limitless production capabilities ::: creative solutions ::: worldwide shipping
